Education

Bachelor of Science in Computer Science

Florida State University

Spring 2021

GPA: 3.50 (FSU), 3.79 (Upper-Division)

- Relevant Coursework
 - Fall 2020 – Operating Systems, Secure Parallel and Distributed Computing with Python, Computer Organization II, Databases, Mobile Programming
 - Completed – Software Engineering I, Data Structures (C++), Object Oriented Programming (C++), Computer Organization I, Discrete Math I & II, Web Applications Development, Introduction to Entrepreneurship

Technical & Language Skills

- Programming Languages- C++, JavaScript, HTML, CSS, Python
- Frameworks- React, Flask, MongoDB, Android Studio, Tableau
- Speaking Languages- Native in both English and Spanish.

Relevant Experience

Information Technology Intern

June 2020-July 2020

Raymond James Financial

- Worked with the Technology Service Center Leadership and the Reporting Team to assess various center-wide Key Performance Indicators and developed a dashboard that shows both real-time and historical information using Tableau.
 - Created a drillable month over month view to help TSC Leadership understand the root causes of spikes in metrics.
 - Created a summary view intended to help managers quickly visualize the delta of eight different metrics at any given month.

Computer Programming Intern

August 2019-June 2020

FSU Innovation Hub

- Led a team of five to develop an end product for *CreatorConnect*, a web application whose goal is to promote the exchange of technical and innovative skills among FSU students and outside employers. (github.com/FSUInnovationHub/CreatorConnect)
- Released a beta version in April 2020. *Due to COVID-19 internship funding was cut and the project has since been deprecated.
- *CreatorConnect beta*
 - Uses MongoDB as a relational database.
 - Uses Flask to host a secure backend server with multiple endpoints.
 - Uses React to connect to the backend server and dynamically render HTML components based on the data it fetches.
 - Uses CSS techniques to allow for access and compatibility across all devices with a browser.

ACM Programming Competition

March 2019

Florida State University

- Placed 16th out of 296 teams.

Projects

Covid-Central

April 2020-May 2020

FSU Innovation Hub

- Led a team of eight over the course of five weeks to develop *Covid-Central*, a centralized hub filled with reliable information, resources, and statistics regarding the outbreak of the COVID-19 virus. (covid19-central.com)
- Attracted over 4,200 site visits as of May 31, 2020.
- *Covid-Central*
 - Populates five different pages (facts, stats, news, resources, commentary) to organize data.
 - Uses News API to return a list of 100 recent news articles that mentioned Coronavirus. The list was then filtered to only include reliable sources.
 - Implements a “flair” system where users could filter through handpicked articles and resources.
 - Fetches from a Google Sheet (created by Google Form responses) where the research team uploaded handpicked articles and resources to cater to certain emotions.

We Are Up Next! Robotics

June 2017-August 2017

Instituto Profesional y Técnico de La Chorrera (Panama)

- Mentored Panamanian middle school children on the fundamentals of robotics for a total of 110 hours over a three-month period.
- Fundraised over \$1000 and purchased two LEGO EV3 robotics kits for the middle school.

Leadership and Awards

InternFSU

August 2019-May 2020

Florida State University

- Chosen as 1 of 100 FSU students to receive an on-campus internship starting Fall 2019 and ending May 2020.

Florida Academic Scholars Award Recipient (Full Tuition Scholarship)

August 2018-Present
